Enter The Company Or Companies You Want To Study

1. Enter a company name, part of a company name, or a brand in column B, a ticker into column C, a web URL into column D, and/or an ISIN number into column D.
2. If the CSRHub name you want does not appear in column J, use the CSRHub name lookup tool (top menu, CSRHub...Company) to paste the right text company name into column J.
3. The data in columns K to Q should help you double check that you have the right name match. The name in column J is the one used automatically on other sheets.
4. If you want to look up more than one company, you can copy the formula in row 4 down as far as you wish.
5. Use the data A to store your internal identifier or version of the company name for later reference. You can change the scope of search using the box starting in column R.
6. Set the date for your report in the box starting in cell S10. Spell out the month and use four digits for the year.
7. Choose Formulas from the top menu, then Calculate Sheet. This will allow our database to update the sheet.
8. Enter your CSRHub site credentials (username/password) when directed.

NA = Rating or information not available. This can also be due to a company with only partial ratings. We do not provide an overall score for partially rated companies.
